

# Developing and deploying optimization strategy for engine calibrations

Akansha Saxena, Cummins  
Matt Butts, Cummins

May 02,2019

Public

*B?l?nc? in life  
is the key to  
happiness.*

## Problem statement

- Optimize engine performance calibrations

## Approach

- Analytical calibration workflow

## Tools used

- MATLAB for almost everything (Data Import, Parallel computing, statistics and Machine Learning, Optimization toolbox, MATLAB compiler)

## Results

- Bubble plots representation

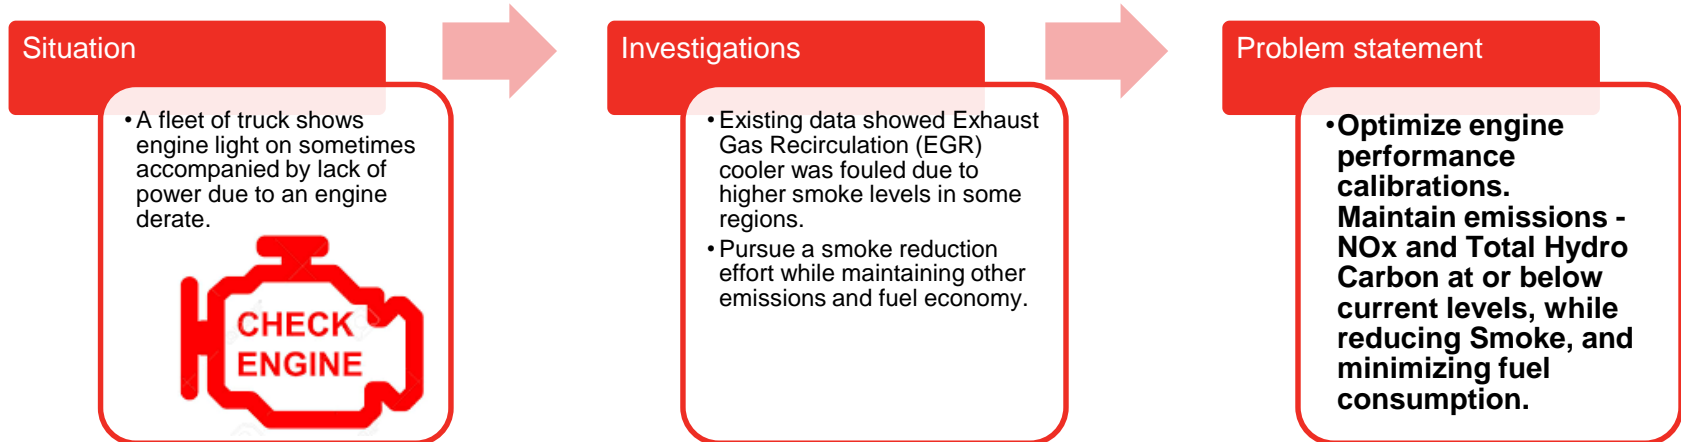

## Key takeaways

# Problem statement

- Due to inherent nature of diesel engine, trying to keep fuel consumption below a certain value yielded increased smoke in some regions of operation that led to EGR fouling.
- Optimize engine performance calibrations.  
Maintain emissions - NOx and Total Hydro Carbon at or below current levels, while reducing Smoke, and minimizing fuel consumption.

# Approach

## Selected levers

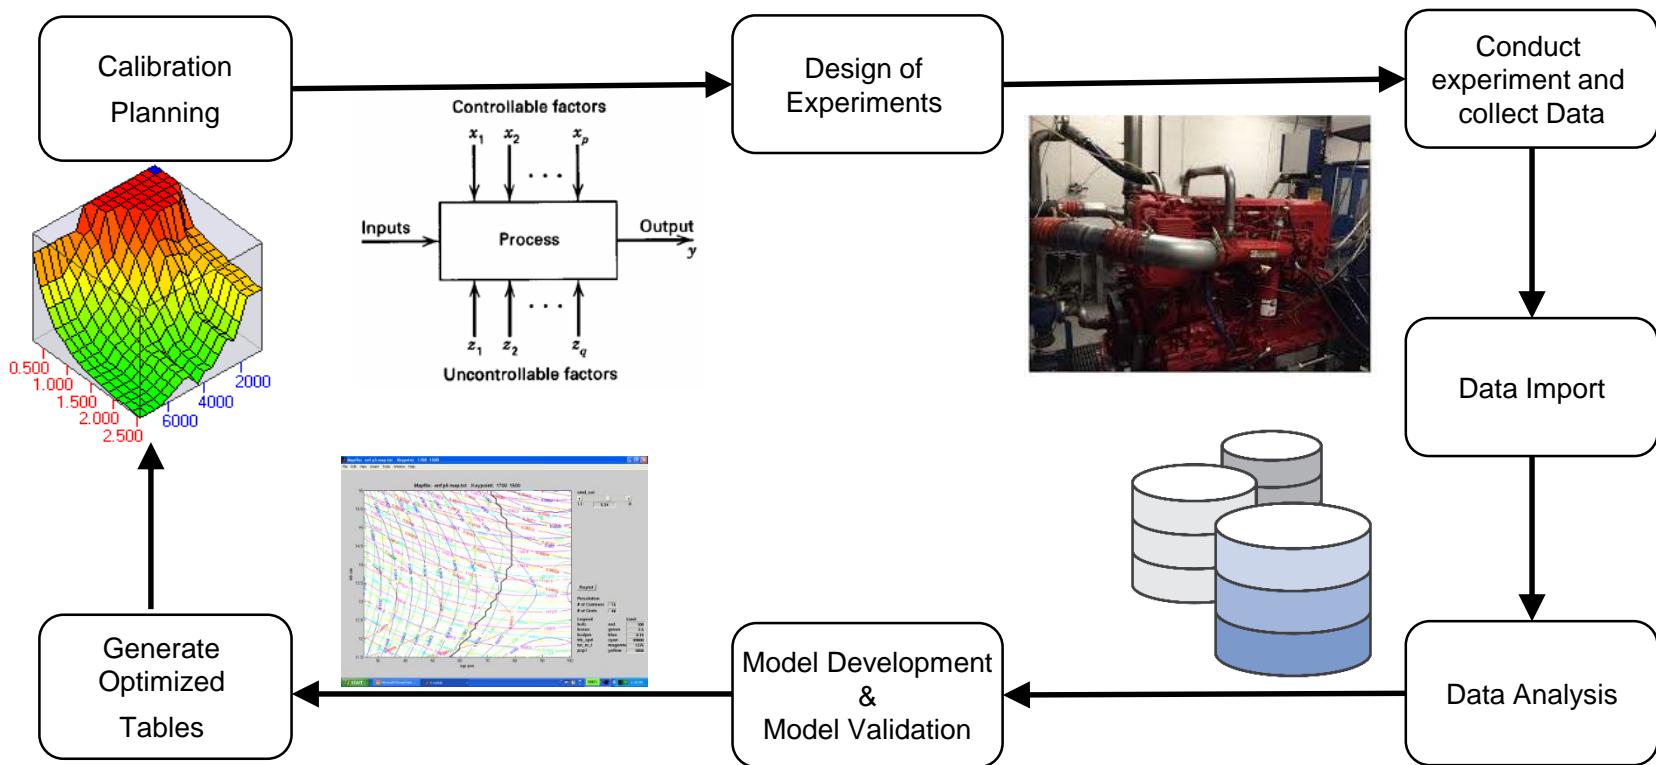

- Scope / Deliverable:
  - Significant smoke reduction
  - Maintain acceptable:
    - NOx
    - HC
    - BSFC
- Primary levers
  - Rail Pressure,
  - Main Injection Timing,
  - Pilot Injection Quantity and Timing, adding Post Fueling
- Levers to balance NOx, THC, and BSFC impact with Smoke reduction.
  - EGR Fraction and Charge Flow Optimization

# Approach Analytical calibration workflow

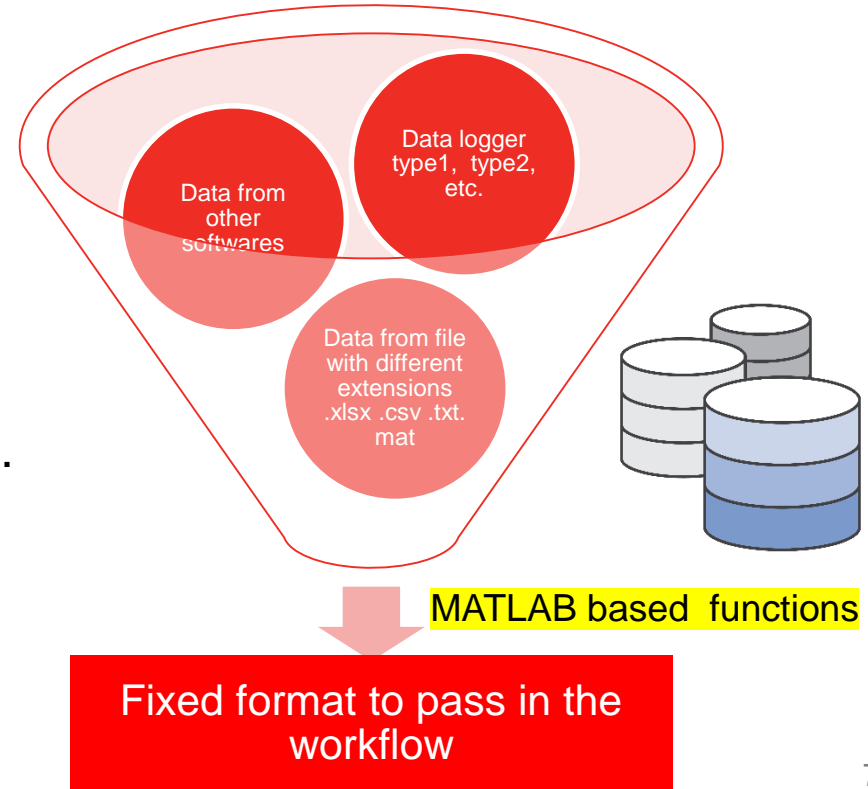

## Tools used Data Import

### ■ Data import

- Data from different loggers, different softwares, different file extensions, formats can be imported, merged, filtered into a fixed format using MATLAB functions.
- It can handle out of memory data.
- Data in this fixed format is used throughout the analytical calibration workflow.

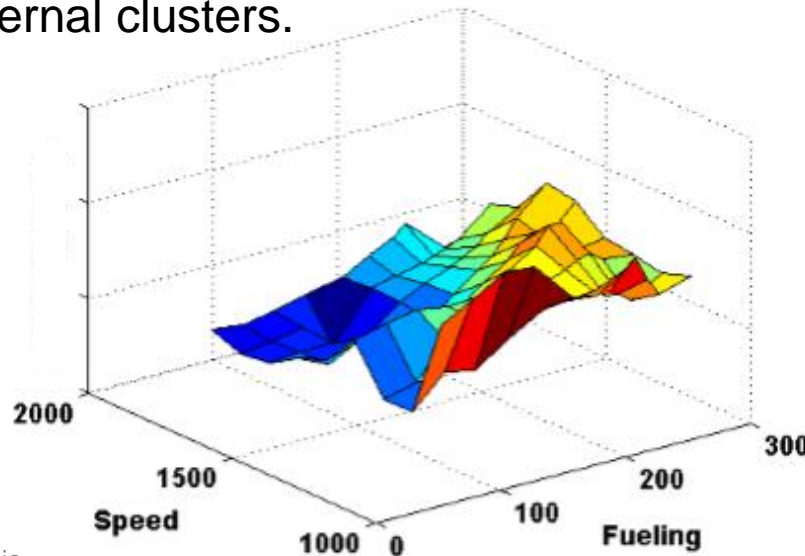

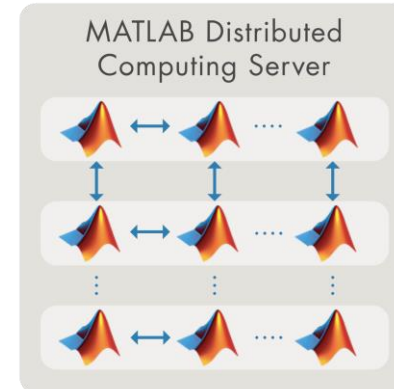

# Tools used Analyzing Data

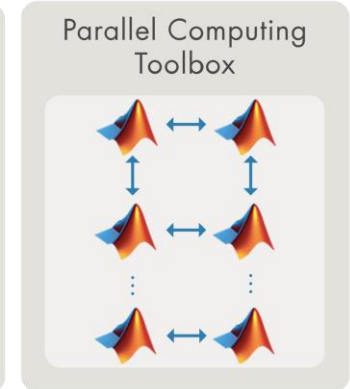

- How to analyze data ?
- Parallel computing allows the desktops to use their multicore processing capability by executing applications on workers that run locally.
- The analysis time was drastically reduced. It can be integrated with Cummins internal clusters.

## COMPUTER CLUSTER

## DESKTOP

Tools used

## Statistics and machine learning; Optimization Toolbox

- To create analytical model.
- MATLAB optimizer implemented in the calibration toolkit gives successful results.

Smoke values getting reduced with the number of optimization iterations.

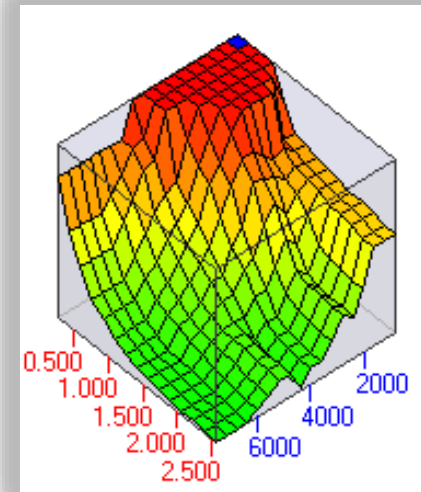

# Tools used Data visualization

## ■ Data visualization

- While developing engine performance calibrations, data visualization is done at multiple stages using MATLAB.

# Tools used Deploying toolkit

- How to deploy toolkit to users who don't have MATLAB ?
- The toolkit is deployed as an standalone executable, that enables users to run compiled MATLAB applications without installing MATLAB.

MATLAB Programmer

Develop Algorithms in  
MATLAB

Package them as  
Standalone  
Applications

## Results achieved

- Engine dyno testing done to verify the results.
- Bubble plots showing
  - Reduction in Smoke
  - Acceptable increase in NOx, HC, PM and fuel consumption.

# Results

## Smoke reduction

Smoke was significantly reduced

# Results

## Acceptable increase in NOx

# Results

## Acceptable increase in Hydrocarbon

Public HC was on par with the baseline. There was a slight acceptable increase.

## Acceptable increase in Fuel Consumption (bsfc)

# Key takeaways

- Proposed Calibration provides significant Smoke Reduction while maintaining other emissions at current levels and having minimal impact on fuel consumption.
- Analytical calibration toolkit has been developed using **MATLAB, Statistics and Machine Learning toolbox, Optimization Toolbox, Parallel Computing Toolbox.**
  - MATLAB and its products integrate computation, visualization, and programming in an easy-to-use environment where problems and solutions are expressed in familiar mathematical notation.
- The toolkit is deployed as an executable using **MATLAB compiler.**
  - When deployed as an standalone executable, the toolkit relies on the MATLAB Runtime, which enables users to run compiled MATLAB applications without installing MATLAB.
  - MATLAB Compiler enables to run multiple instances of code without acquiring additional licenses.
- MATLAB documentation and support from MathWorks engineers is excellent.
- This method has been very successful in optimizing engine performance calibrations.
