# MATLAB EXPO 2018

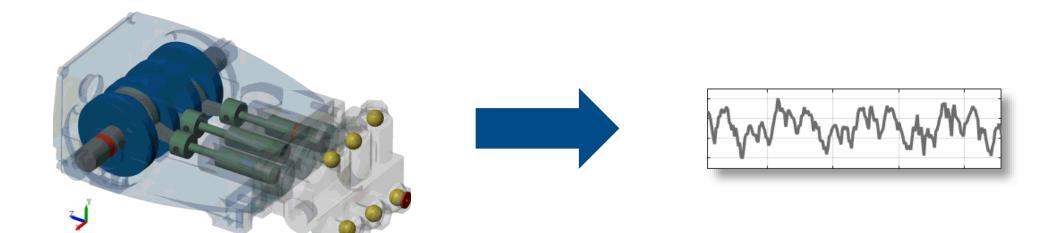

Predictive Maintenance From Development to IoT Deployment

Simone Lombardi, PhD Application Engineer The MathWorks

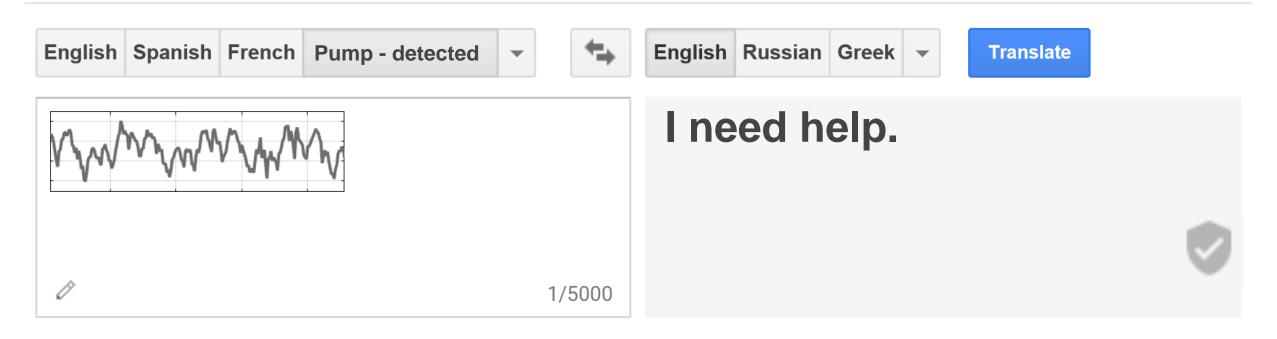

#### What is Predictive Maintenance?

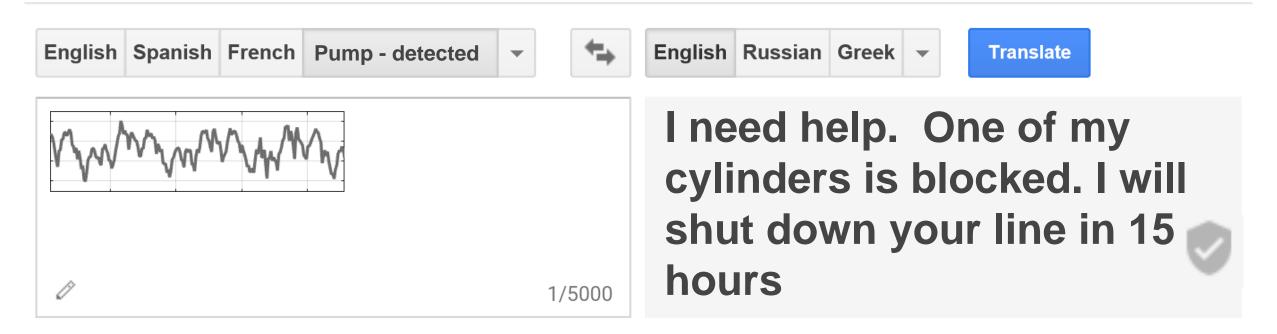

#### Translate

#### Translate

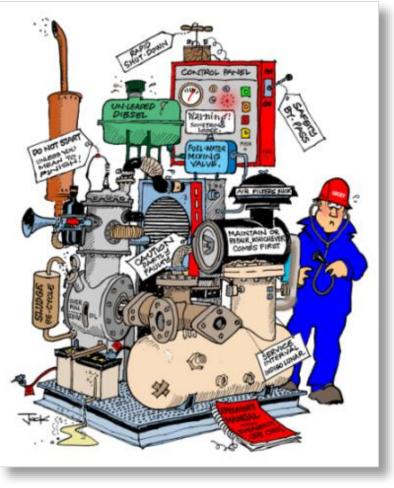

#### What do you expect from predictive maintenance?

- Maintenance cares about day-to-day operations
  - Reduced downtime
- Operations & IT look at the bigger picture
   Improved operating efficiency
- Engineering groups get product feedback
  - Better customer experience
- Upper management wants to drive growth
  - New revenue streams

### Why MATLAB & Simulink for Predictive Maintenance

- Get started quickly
- Reduce the amount of data you need to store and transmit
- Deliver the results of your analytics based on your audience
- Create training data for your algorithm in the absence of real failure data

#### Challenges: How much data are you collecting?

- 1 day ~ 1.3 GB
- 20 sensors/pump ~26 GB/day
- 3 pumps ~ 78 GB/day
- Satellite transmission
  - Speeds approx. 128-150 kbps,
  - Cost \$1,000/ 10GB of data
- Needle in a haystack problem
  MATLAB EXPO 2018

#### **Solution: Feature extraction at the Edge**

- How do you extract features?
  - Signal processing methods
  - Statistics & model-based methods
- Which features should you extract?
  - Depends on the data available
  - Depends on the hardware available
- How do I deal with streaming data?
  - Determine buffer size
  - Extract features over a moving buffer window

#### Challenges: What do your end users expect?

- Maintenance needs simple, quick information
  - Hand held devices, Alarms
- Operations needs a birds-eye view
   Integration with IT & OT systems
- Customers expect easy to digest information
  - Automated reports

Data Sources Analytics Platforms Fleet & Inventory Analysis Hand neid Devices

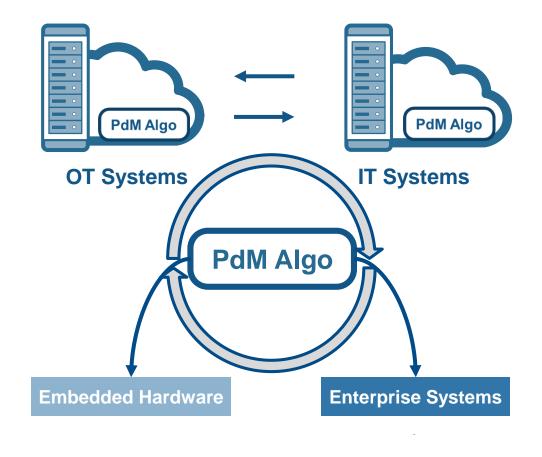

#### **Solution: Flexible deployment of algorithms**

 Can I reuse my algorithm code for deployment?

- How do I update my predictive model?

• How do I integrate with my IT/OT systems?

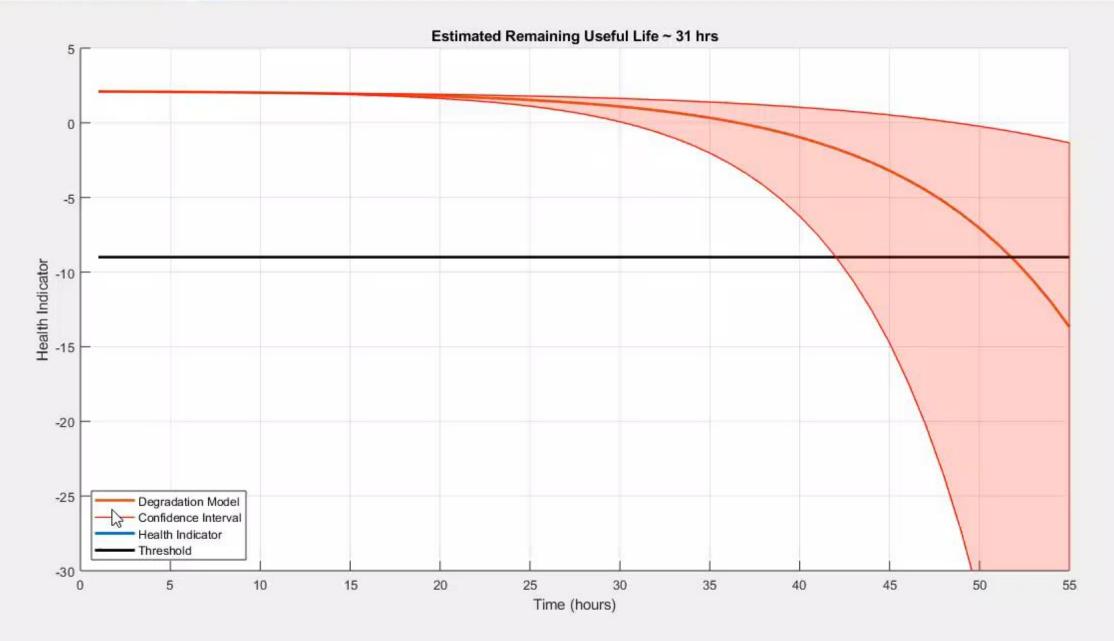

#### \star Figure 1

#### **Solution: Flexible deployment of algorithms**

- Can I reuse my algorithm code for deployment?
  - Code generation at the Edge
  - Libraries & executables for IT/OT systems
- How do I update my predictive model?
  - Retrain degradation models for RUL estimation
  - Retrain classification models for fault isolation
- How do I integrate with my IT/OT systems?
  - Connect to data sources & scale computations
  - Connect to dashboards & analytics platforms

#### Challenges: What if you don't have the data you need?

- Lack of labelled failure data
- Multiple failure modes and failure combinations possible
- Different machines can show different behavior for the same failure

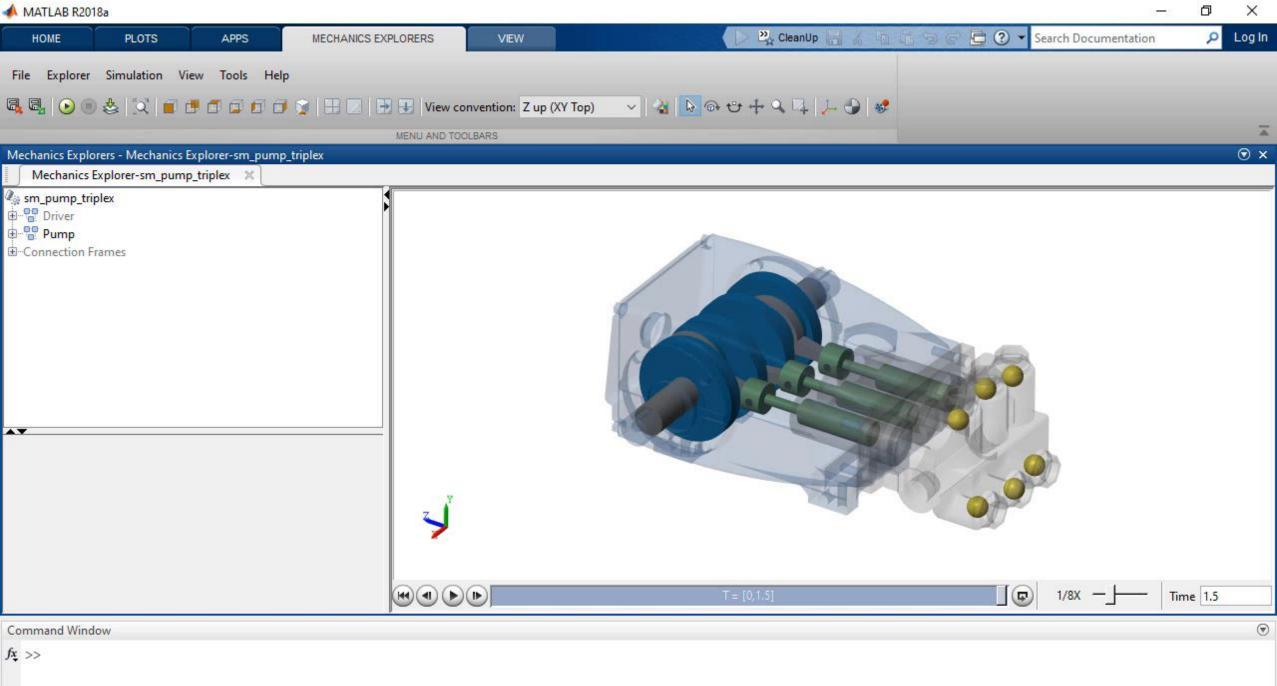

### **Solution: Generating failure data from Simulink models**

- How do I model failure modes?

 How do I customize a generic model to a specific machine?

 How do I know if the data is accurate?

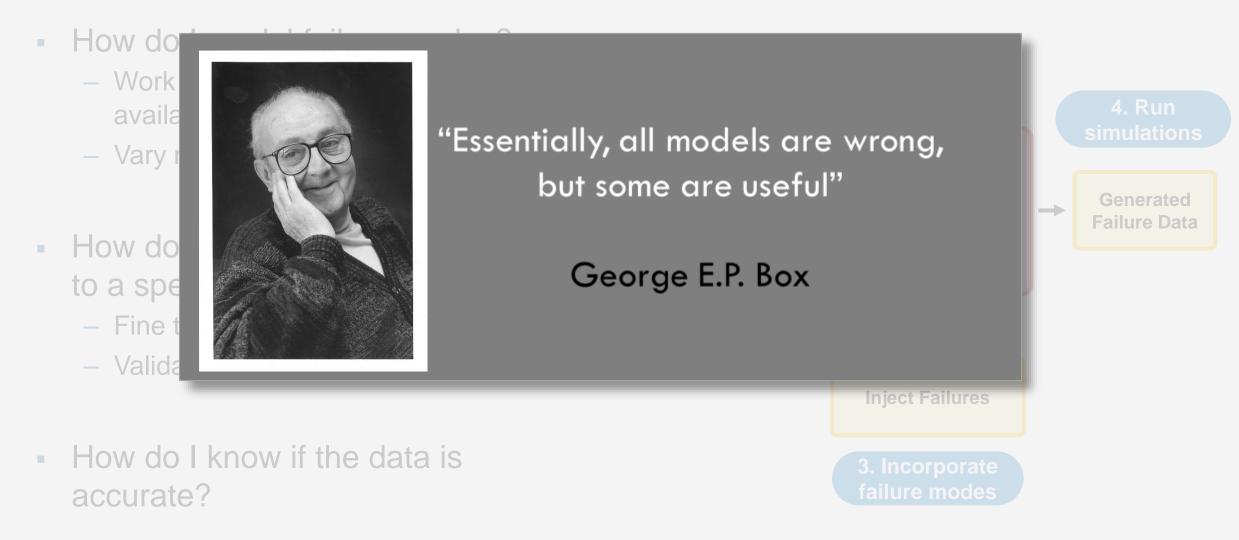

#### Solution: Generating failure data from Simulink models

- How do I model failure modes?
  - Work with domain experts and the data available
  - Vary model parameters or components
- How do I customize a generic model to a specific machine?
  - Fine tune models based on real data
  - Validate performance of tuned model
- How do I know if the data is accurate?

## Solution: Generating failure data from Simulink models

### Why MATLAB & Simulink for Predictive Maintenance

- Get started quickly
- Reduce the amount of data you need to store and transmit
- Deliver the results of your analytics based on your audience
- Create training data for your algorithm in the absence of real failure data
